XUV500

CONCEPT

ASK FOR THE MOON, AND WE GIVE YOU THE SKY, TOO

The Mahindra XUV 500. Out-of-the-box design. Latest-generation technology. Interior where comfort reigns supreme. A new SUV concept hits the road. It shrinks from nothing, with AWD that automatically transfers torque to the four wheels, for driving pleasure over all terrains. Safe, thanks to electronics that keep the car firmly on the road and assist the driver in the most demanding situations.

Versatile, with folding seats giving you plenty of space for everything you need to carry. A full-fledged SUV in every way, with a comes-as-standard equipment list that includes everything, even the sky, or rather, the skies – all those you'll see passing overhead through the sunroof.

**FOR ONCE,
CHOOSE TO HAVE IT ALL.**

EXTERIOR

THE MOMENT YOU SEE IT, YOU KNOW IT WILL KEEP ITS PROMISES

Muscular but elegant lines, as perfect for urban backdrops as for breathtaking scenery. Uniqueness becomes style, interpreted with painstaking care applied to every detail. The rugged front grille, highlighted by chrome accents. The chrome trim of the windows that underlines the design of the sides. The sinuous and welcoming 'eye' of the front fog-lights, enhanced by their chrome frame. These details encapsulate a unique personality, with the self-confidence of being different from the others. This strong character is highlighted in the racing-inspired double exhaust pipes and in the alloy wheels, becoming softer in the

curves of the wing mirrors, with incorporated indicators and courtesy lights. Attention to all the needs of driver and passengers alike is shown by details such as the additional side lights that let you see perfectly even the inside of bends, or the illuminated sill plates. The roof opens electrically, allowing you to become immersed in the natural landscapes. Nothing is left to chance, in a design in which each line is drawn in such a way as to enhance the harmony between beauty and practicality.

APPEARANCE IS SUBSTANCE.

INTERIOR

A WHOLE WORLD – YOUR WORLD – FITS INSIDE

Impressive amounts of room, instantly perceptible comfort. Starting from the three rows of anatomic seats, designed for six passengers to travel in complete comfort, with luxurious leather on the W8 and W10 models. The driver's seat can be adjusted in 8 different ways to adapt it perfectly to each driver's specific size and driving style. The ergonomic controls have been carefully designed and the instrument panel is a control centre that makes the most of the on-board computer with satellite navigation. The 7" (W8 and W10) touchscreen also displays the rear camera

images. The right climate is ensured on all journeys and in every season by a system with individual vents, within the comfortable, high-tech atmosphere of the interior "blue ice" light. Practical storage compartments are available to store all personal items, even including drinks, with a refrigerated central section. And when you want to use all available space, the two rear rows of seats can be folded down, to give you a completely flat and easily accessible floor area.

**FINALLY,
ALL YOUR WISHES CAN COME TRUE.**

YOUR DESIRE TO TRAVEL KNOWS NO BOUNDS

ENGINE - Flexibility in urban traffic, the necessary power to overtake on highways, the reliability of an engine tested on roads around the world. The 2,200cc, 140 HP mHawk engine generates torque of 330Nm, for outstanding suppleness at the lowest rpm and immediate response when moving off at traffic lights.

START & STOP - The engine delivers generous levels of performance, but consumption is limited thanks to this system which puts the engine on stand-by 2.5 seconds after stopping the car.

DUAL MASS FLYWHEEL - Reduces vibrations to give a smoother drive and more fluid gear-change. With this technical solution, the XUV 500 engine is one of the most sophisticated on the market.

AWD - Engine power is exploited fully by the AWD, which thanks to latest-generation electronic control automatically distributes torque between front and rear axles, ensuring traction and control in the event of poor grip.

HILL DESCENT AND HILL HOLD - On more demanding roads, the Hill Hold Control prevents the danger of sliding backwards at the start of a climb, while on steeper descents or on slippery roads, switching on the Hill Descent Control further increases safety.

ESP - This electronic management system constantly controls vehicle movements and direction and, when it senses loss of control, it acts on brakes and drive until stability is recovered.

ABS - Advanced ABS + EBD with anti-roll system and traction control is an electronic system that ensures progressive braking on slippery roads where there is very little grip, preventing the wheels from skidding. Additional safety in every season.

SUSPENSION - The suspension has been designed together with Lotus from the UK, for use either on or off-road. To optimize the road-holding of the Mahindra XUV500 in such diverse situations, the designers opted for an independent wheel solution McPherson at the front, Multi-link at the rear with coil springs and stabilizer bars.

SAFETY AND COMFORT AS STANDARD

AIRBAG – The passive safety is exhaustive and effective, with 6 airbags: one for the driver and front passenger, two side and two curtain airbags (W8-W10 versions).

MONOCOQUE STRUCTURE – The secret of the Mahindra XUV 500's dynamic qualities lies in its integral frame and body construction. The result is an excellent power-to-weight ratio, unrivalled handling and uncompromised driving pleasure.

INFOTAINMENT TOUCHSCREEN – All your journey information and space for entertainment, too, with the new multi-language infotainment system, complete with route data. The system features GPS and a USB port.

NAVIGATOR – You choose your destination. Reaching it will be easy, with route data provided by the standard satellite navigation system that covers 1.5 million kilometres of roads in 1200 cities.

TYRE TRONICS – Instant update on any tyre abnormalities. This electronic system contributes to safety and extends tyre duration.

REAR CAMERA – Parking in crowded or small spaces is no longer an issue, thanks to this assistance system with standard in-built rear camera (W8-W10) and sonic alarm that flags up obstacles within an area of 1.2m.

ADDITIONAL LIGHT FOR BEND VISION – To drive safely at night, additional side lights illuminate bends before you take them.

PUDDLE LIGHT – Attention to passengers is also shown by small details like the puddle light, so that you don't step into mud or puddles when parking in dark areas; it also helps should you drop your keys or other personal items.

RAIN SENSORS – Advanced sensors detect rain and automatically switch wipers on and off. The system also controls wiper speed depending on the amount of rain.

AUTOMATIC LIGHT SENSOR – Lights turn on or off automatically, according to the amount of light in the environment. Suddenly entering a tunnel will no longer take you by surprise!

SPORT PACK AND ENTERTAINMENT PACK

IT HAS ALWAYS GIVEN YOU EVERYTHING. NOW THERE'S EVEN MORE

The already abundant equipment list of the XUV500 has been extended thanks to two exclusive trims made for those who prefer a sportier look or who are enamoured of all things high-tech. The **Sport Pack** offers you bold Dual Tone orange/black, white/black, silver/black and red/black colours, highlighted by the sporty design of the matt-black 18" alloy wheels. The **W10 Entertainment Pack** has been designed to make light of even the longest journeys,

with entertainment offered via the two displays built into the front head rests and the high-fidelity soundtrack of the Premium audio system with DAB (Digital Audio Broadcasting). Those who want everything, but really everything, can combine the features of these two trims and have a really unique XUV500.

**MAHINDRA XUV500.
THERE IS NO LIMIT TO THE BEST.**
